Welcome

A joint meeting of

ISFSI

International Society for Functional Source Imaging

ISBEM

International Society for Bioelectromagnetism

ISNIP

International Society for Neuroimaging in Psychiatry

ECNS

EEG and Clinical Neuroscience Society

ISBET

International Society for Brain Electromagnetic Topography

*BaCI 2013 was the first international conference on **Basic and Clinical multimodal Imaging (BaCI)**.*

It was a joint meeting of five international societies interested in the promotion and dissemination of non-invasive imaging methods that allow to understand human brain functions and their disturbances in neurological and psychiatric diseases. The meeting was an attempt to bring together basic and clinical scientists to discuss the newest methodological advances in imaging methodologies and their experimental and clinical applications.

*The meeting was attended by **367 Participants** from **25 different countries***

It featured:

- **7 Keynote Lectures**
- **16 Symposia**
- **155 Posters**

16 Sponsors and 9 exhibitors supported the conference.

Details of the program can be seen on the subpages of this site.

You can see a detailed report of the meeting and the results of the survey that was launched after the meeting [here](#).

A slideshow movie of photos taken by our photographer Raphael Theze-Boissonnet can be seen and downloaded [here](#)

Alternatively the individual photos can be seen [here](#).

We hope we can welcome you soon again to the next BaCI meeting. It is planned for 2015 and we are working hard to make this happen.

Any proposals for the next meeting can be sent to: Christoph.Michel@unige.ch

In the name of the organizing committee I thank all participants for their very active contributions to the success of the meeting.

Christoph Michel
Chair
